**Subject:** RE: Waste Connections

Tobi,

I already did we need to do a lead acetate test strip for the sulfide reactivity which we are working on expediting.

Thanks TJK

**Subject:** RE: Waste Connections

Can you specifically ask her about the sulfides ranging from 160-1100 ppm and the total cyanides ranging from 1.8-26ppm. These are not necessarily a RCRA issue, but could be an Environmental/Health/Permit issue.

**Subject:** Waste Connections

Tobi,

The waste connections site has been down so I cannot upload the profile and data. They are hoping it will be up this afternoon and I will verify a meeting with Sarah on site at 10:30 tomorrow. See below for what they cannot take.

Hi Thomas,

I apologize for not responding to your email yesterday afternoon sooner. I'm currently on a conference call but I can give you a ring later today if that works?

In the meantime, it may be easier to give you what we CAN'T accept at Front Range.

- Hazardous wastes as defined by 40 CFR 261
- Liquid wastes that do not pass paint filter
- Medical wastes including chemotherapy waste, pharmaceuticals, medical marijuana waste (on occasion we can accept marijuana wastes with approval from the state)
- Bulk animal carcasses or body parts
- Incinerator fly ash
- Regulated radioactive wastes (above background action levels)
- Wastes containing regulated volumes of PCBs
- Friable Asbestos (we CAN take non friable)
- Liquid dairy industry by-products
- Domestic septic sludge
- Electronic wastes
- Any waste streams specifically prohibited by current state/federal regulations

I will update this afternoon.

Thanks TJK
